OMP-N® - For more Quality

Organic Modified Polymer-Network

composed of a modified PMMA-molecular structure which generates through cross-linked macro molecules on nano level a dense network.

Features and Benefits

- free from inorganic fillers and fibres
- tissue-friendly, plaque-resistant
- lasting colour stability and aesthetic
- life-like fluorescence and shade effect
- temperature resistant and non-deforming
- abrasion-resistant thanks to dense OMP-N®
- homogeneity and high cross-linking due to most modern industrial production
- shock-absorbing
- extreme flexural strength over 90 MPa due to high elasticity
- quick and outstanding polishing characteristics
